

Figure 1 is my sample figure.

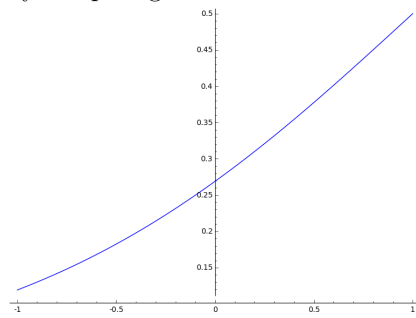

Figure 1:  $A = 1$ ,  $K = 1$ ,  $Y = 1$

If you let  $A$  bigger, you will find the value is larger in y-axis

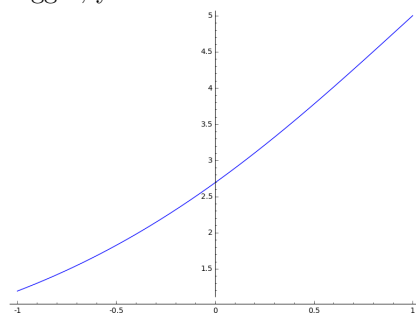

Figure 2:  $A = 10$ ,  $K = 1$ ,  $Y = 1$

If you let  $K$  bigger, you will find the value of would increase quickly than 1

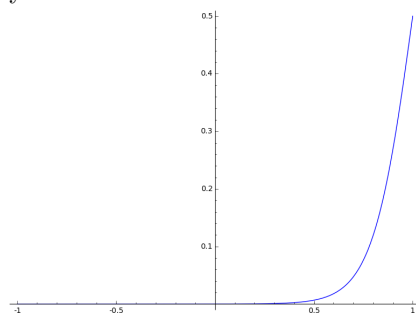

Figure 3:  $A = 1$ ,  $K = 10$ ,  $Y = 1$

If you let  $Y$  bigger, you will find the shape shift right

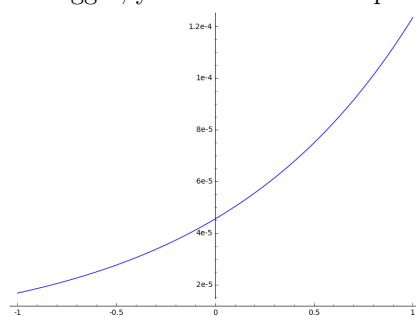

Figure 4:  $A = 1$ ,  $K = 1$ ,  $Y = 10$
